ORADEx ANTIBACTERIAL MOUTHWASH

Oradex Antibacterial Mouthwash contains 0.12% Chlorhexidine Gluconate. It is the preferred choice for the prevention and treatment of periodontal disease, swollen and bleeding gums, mouth ulcers and other common oral and throat infections.

Uses and Benefits

- Prevent dental plaque formation.
- Treatment of gingivitis, mouth ulcers, sore throat.
- Promote healing after oral surgery, dental implants, extractions and periodontal surgery.
- Control infection and reduce risks of aerosol contamination during dental surgery.
- Suitable for all ages and those sensitive to alcohol.
- User-friendly pleasant and soothing to the mouth without the side-effects of alcohol.

CLINICAL TESTS

The Efficacy Of An Alcohol-Free 0.12% w/v Chlorhexidine Gluconate Mouth rinse (Oradex) UMA.S*, Dasan Swaminathan, Faculty of Dentistry, University of Malaya, Kuala Lumpur.

Materials and Methods

A group of 60 subjects (48 females, 12 males; age range 22 to 46 years), were recruited from the staff of the University Hospital. Prior to their participation, they were meticulously screened to ascertain if they conformed with the criteria for the study.

The trial design was a placebo-controlled, double-blind, crossover type consisting of two 14-day test periods separated by a washout period of 4 weeks.

CLINICAL RESULTS

1. Plaque Score

Higher percentage of subjects were found to have improved plaque status when they rinsed with chlorhexidine compared to placebo (71.7% Vs 35%). The difference was found to be statistically significant ($p < 0.05$).

2. Gingivitis Score

Higher percentage of subjects exhibited improved gingival status when they rinsed with chlorhexidine compared to placebo (85% Vs 28.3%). The difference was found to be statistically significant ($p < 0.05$).

3. Papilla Bleeding Score

Higher percentage of patients had reduced papilla bleeding when they rinsed with chlorhexidine compared with placebo (90% Vs 45%).

ORADEx DUAL ACTION ORAL RINSE

Hexetidine and thymol combination mouthwash is proven effective against bacteria in the mouth and throat. Since hexetidine and thymol has both analgesic and antiseptic properties, it relieves pain symptoms while eliminating germs.

Oradex Dual Action Oral Rinse contains 0.10% Hexetidine and 0.10% Thymol. It is specially formulated for soothing antibacterial protection, providing symptomatic relief of inflammation and pain in the mouth such as mouth ulcers, sore throat and toothache. Use as part of a daily oral care regime or for specific symptomatic relief.

ORADEx SUPREME MOUTHWASH

Anaerobic bacteria including gram-negative anaerobes and volatile sulphur compounds (VSC)-producing bacteria causes smelly breath. The same bacteria is responsible for gum disease and bleeding gums. Oradex Supreme Mouthwash contains 0.10% Chlorhexidine Gluconate and 0.10% Thymol. This combination significantly reduces VSCs and gram-negative anaerobes with superior antimicrobial action.

Rinsing with Supreme also provides long-lasting action (prolonged germ/viral kills in the mouth) of up to 12 hours due to the substantivity of chlorhexidine's dicationic nature. For the best in fresh breath and oral hygiene, rinse with Oradex's Supreme Mouthwash.

ORADEx SUPREME MOUTHWASH

ORADEX MOUTHWASH

Gum disease is a silent disease that may not cause pain until it has reached a severe stage. If your gums bleed even sometimes, something is wrong. Periodontitis (gum disease) occurs when infection of the gums is left untreated. Infection and inflammation spreads from the gums to the ligaments and bone that supports the teeth, causing teeth to loosen and eventually fall out.

Periodontal disease has overtaken dental caries as the main cause of tooth loss and can affect overall health. Daily use from our mouthwash range ensures tiptop periodontal health. They contain clinically proven antibacterial agents that stops bleeding gums, removes bad breath, and relieves tooth and gum aches caused by infections. All our mouthwash are Alcohol Free, Paraben Free and SLS Free.
