

QUEST ESSENTIALS RANGE

ENZYME DIGEST

Enzymes, betaine HCl & peppermint oil to aid digestion and for relief of digestive discomfort

DESCRIPTION

Contains a broad spectrum of enzymes needed to support proper digestion of proteins, carbohydrates and fats. Combined with betaine HCl and peppermint oil, which help maintain effective digestion, peppermint has a carminative and antispasmodic action. Supplementing additional digestive enzymes is useful with increasing age, in cases of digestive disorders where digestive potential is compromised and to help reduce symptoms of disturbed digestion such as heartburn, indigestion, bloating or flatulence. Recommended for sports persons to aid digestion of protein, the elderly or when levels of enzymes produced become insufficient.

DIRECTIONS

Take up to two tablets with each meal and swallow with water.

FEATURES

- Broad spectrum digestive enzyme formula
- Contains betaine HCl to support enzyme digestive potential
- Peppermint oil acts as a carminative and antispasmodic co-factor

HEALTH NEEDS

- Gut & Digestion Senior's Health

INGREDIENTS

Bulking agent: microcrystalline cellulose, betaine HCl, amylase (with maltodextrin), lipase (with maltodextrin), bromelain (with maltodextrin), papain, magnesium stearate, anti-caking agent: silicon dioxide, peppermint oil, glazing agent: hydroxypropylmethylcellulose.

SUITABLE FOR / FREE FROM

- Vegetarians Vegans Gluten-free Dairy-free
 Nut-free

NUTRITIONAL INFORMATION

ONE TABLET PROVIDES:

Papain (6 000 USP Units/g)	33.3 mg
Amylase (40 000 SKB Units/g)	10 mg
Lipase (105 000 Lipase Units/g)	5.56 mg
Bromelain (1200 GD Units/g)	5 mg
Betaine HCl	100 mg
Peppermint Oil	0.25 mg
