

QUEST ESSENTIALS RANGE

GLUCOSAMINE 1500mg

For joint health and reduction of discomfort associated with arthritic conditions

DESCRIPTION

Glucosamine is a key structural component of cartilage, it is needed to support joint health and integrity. It has been shown to help improve joint mobility and function and reduce stiffness and pain. Glucosamine is recommended for sufferers of degenerative joint conditions such as osteoarthritis or those who place extra strain on joints such as manual or physical workers and athletes.
